

Cohort Explorer has a new Spotlight™: Acute Myeloid Leukemia (AML)

Learn more on how to leverage the new cohort to see real world treatment journeys and outcomes for patients across the Syapse Learning Health Network™

Example exploratory questions from AML

Syapse Spotlight™ | Capturing the longitudinal patient journey

Patient Information and History	Including pre-cancer and non-cancer care
Cancer Characteristics	Including relapsed and/or refractory status and ELN risk criteria
Testing Results	Including molecular and biologic classification
Treatments and Non-cancer care	Including line of therapy, dosing, and procedures (e.g., HCT)
Clinical Effectiveness Outcomes	Including overall survival and time to next treatment
Safety Outcomes	Including hospitalizations
Follow-up Care	Including palliative care

A **real-world evidence** company working across key stakeholders as they use real-world evidence to improve the outcomes of patients with cancer.

THE BASICS: COHORT EXPLORER

Cohort Explorer brings together de-identified data across large community health systems. A web-based tool designed to answer commonly asked questions,

Which patients relapse and what characteristics stood out for early relapse?

Which mutations impacted therapy choice?
